**ABSTRACT OF THE DISCLOSURE**

Abstract of the Disclosure

An improved structure of a computer housing comprising a front side board, a rear side board, a top side board, a bottom side board, a left side board, and a right side board, characterized in that a plurality of pivot members are

5 hingedly disposed along the edges of the respective side boards, the side boards having one edge adjacent to other side boards, a plurality of securing seat plates are provided on the front side board for the mounting of an optical disc, a hard disc and soft disc, a holding seat plate is disposed on the rear side board for the mounting of a power source supply, and a plurality of the pivot

10 members are formed along one edge of the front side board and a rear side board such that the computer housing can be spread out on as a flat plan.

The present computer housing requires a small space for transportation and therefore the cost of transportation is greatly saved. In addition, the present invention provides a convenient installation and maintenance.
